

Come and join us for some specialised beef CPD!

Engaging and working with beef farmers can often feel more challenging than working with dairy farmers. However, as vets we are well placed to provide expert advice and services to help drive profit on these farms. In the afternoon, we will go to one of our beef clients to demonstrate the value of pre-breeding checks on heifers- this will also provide an opportunity to learn how to do pelvic measuring.

Kat Hart

BSc BVSc Cert AVP (Cattle) MRCVS

A ONE DAY PRACTICAL COURSE WITH SMALL GROUPS

- ✓ Get to grips with Beef Herd Health Planning
- ✓ To address real life scenarios of how you can help when things go wrong
- ✓ Hands-on investigation into beef farm data and tips on where to start
- ✓ On-farm practical learning of how and when to carry out pre-breeding checks and pelvic measuring
